

2016 AQMP White Paper “A Business Case for Clean Air Strategies”

Working Group #7

09/30/2015

Elaine Shen, Ph.D.

Program Supervisor

Planning, Rule Development & Area Sources

Differences between Preliminary Draft and Draft Final

□ Preliminary draft

- **Released prior to the June 23, 2015 Business Case Working Group Meeting (#6)**

□ Draft final

- **Released on September 4, 2015**
- **Incorporates stakeholder comments and some minor edits**
- **Will present to Governing Board on October 2, 2015 with 7 other white papers**

Revisions based on stakeholder feedback

1. Add more stationary source examples

- a. We provide two additional examples for stationary-source facilities (p. 12)**
 - i. Targeted Air Shed Grants
 - ii. High Volume Low Pressure spray guns
- b. We highlight SCAQMD rules 219 & 222 which reward low-emission sources with streamlined permitting process or permit exemption (p. 10)**
- c. We point readers to the ‘Industrial Facility Modernization’ White Paper which further explores business cases for stationary sources (p. 2)**

Revisions based on stakeholder feedback

2. Discuss macroeconomic conditions

- a. We give an economic snapshot of the goods movement sector in the Basin and highlight the importance of the sector to the regional economy** (in addition to the original discussion of why NO_x reductions in this sector are crucial to attain federal clean air standards) **(p. 2)**
- b. We clarify that an extensive socioeconomic analysis will be conducted in the upcoming AQMP to address regional economic impacts. (p. 9)**

Revisions based on stakeholder feedback

3. Add clarity and depth to planning concepts

- a. Rewrote technology-neutral approach section (p. 16)**
- b. Added discussion of recent federal actions that aim to coordinate and further incentivize private investment in clean tech RD&D (p. 18)**
