Subject: MND for Mixed Use Project at 9400-9412 Valley Blvd, Rosemead

Dear Mr. Everling:

I have reviewed the above-mentioned document and have the following comment.

To facilitate the review of the air quality analysis you will still need to attach to the Appendix (A) the URBEMIS 2007 model output printout. The printout has all the assumptions relating to type and number of equipment used, plot size, and the mitigation measures, etc. Given the tables in the report, the analysis would be ok., and you would not have to resubmit the MND to me for further review.

Call me if you have any questions.
