
Solar Technology Initiative

Kelly Trainor Gamino

August 30th, 2017

Solar Technology Initiative

- In February 2017, the SCAQMD Governing Board directed staff to convene a public working group to develop a Solar Technology Initiative
- Purpose of the Initiative is a review of potential cost-effective ways to include solar in implementing the 2016 AQMP

Solar Technology Initiative

- The Initiative will use scenarios from the proposed tool and provide a guiding document for better integration of major planning issues regarding solar technologies
- At a minimum the Initiative will identify solar technologies, advantages and disadvantages, potential emission reductions and costs, and any action items
