Subject: Agenda Item 17: Port Indirect Source Rule

Re: Agenda Item 17: Port Indirect Source Rule

Dear Members of the AQMD Board:,

I am writing to express my OPPOSITION to an Indirect Source Rule (ISR) and my SUPPORT for a Memorandum of Understanding (MOU) for the Ports of Los Angeles and Long Beach.

I disagree with the SCAQMD staff's assessment that the Ports have not been doing their part to reduce emissions. Even though these last two years have brought an unprecedented amount of strain on the global supply chain, the Ports have managed to implement emerging zero emission technologies and have taken action to proceed with the Clean Truck Fund Rate - which will raise \$100 million for clean trucks. What's more, the Ports overall have demonstrated a 90% reduction in diesel particulate matter despite a 21% growth in cargo since 2005.

The Ports of Long Beach and Los Angeles are essential gateways for commerce. The goods movement industry is vital to the regional, state, and national economy. An Indirect Source Rule will place a cap on the ports, which will have a significant effect on the Southern California economy, and the supply and flow of goods nationwide.

An Indirect Source Rule is unnecessary. Please continue to work with both ports on voluntary measures to reduce emissions without disruptions to the supply chain.

Sincerely,
Thomas Jelenic
