FOR IMMEDIATE RELEASE: October 26, 2019

South Coast AQMD Continues Smoke Advisory Due to Martinez Fire in City of Thermal

Valid: Sat., October 26, through Sun., October 27, 2019

This advisory is in effect through Sunday afternoon. South Coast AQMD will issue an update if additional information becomes available.

A large debris fire called the Martinez Fire is burning near the intersection of Avenue 66 and Martinez Road in the city of Thermal in the Coachella Valley. The burn area is approximately 31 acres with 50% containment. Information on the fire can be found at <https://inciweb.nwcg.gov/incident/6651/>. Smoke from the fire has been impacting Thermal, La Quinta, and Mecca, as well as communities near the Salton Sea. The South Coast AQMD has deployed two temporary PM2.5 monitors west of the fire in Thermal and east of the fire in Mecca. Visit

<https://xappprod.aqmd.gov/SMSDataSite/Home/AdminIndex?MonitoringSiteId=13> to view current readings from the South Coast AQMD's monitor in Thermal and

<https://xappprod.aqmd.gov/SMSDataSite/Home/AdminIndex?MonitoringSiteId=14> to view current readings from the South Coast AQMD's monitor in Mecca.

Winds are predicted to be from the southeast on Saturday morning and afternoon, pushing smoke to the northwest towards Thermal and La Quinta. On Saturday evening into the overnight hours, winds are expected to come from the north, pushing smoke to the south towards the Salton Sea. On Sunday morning, winds are predicted to be from the southeast, pushing smoke to the northwest towards Thermal and La Quinta. Elevated ground level concentrations of PM2.5 are expected in the early morning hours. If the fire continues to generate smoke, impacts are expected to continue throughout the Coachella Valley.

Overall, meteorological conditions may bring smoke and ash into portions of the Coachella Valley. Air quality may reach Unhealthy for Sensitive Groups or higher in areas directly impacted by smoke.

In any area impacted by smoke: If you smell smoke or see ash due to a wildfire, limit your exposure by remaining indoors with windows and doors closed or seeking alternate shelter, and avoiding vigorous

physical activity. For more tips on protecting yourself during a wildfire, see South Coast AQMD's Wildfire Smoke & Ash Health & Safety Tips page: <http://www.aqmd.gov/wildfire-health-info-smoke-tips>.

Areas of direct impacts and poor air quality may include portions of:

- **Riverside County:** Coachella Valley (Area 30)

Previous Smoke Impacts

At the monitor in Thermal, since Friday evening, 24-hour average PM_{2.5} concentrations have been between 6.5 and 23.0 micrograms per cubic meter (ug/m³). The highest hourly concentrations are occurring on Saturday morning, with a peak hourly concentration of 92 ug/m³. Peak air quality index values, calculated with the NOWCAST method, were in the **Unhealthy** category.

At the monitor in Mecca, since Friday evening, 24-hour average PM_{2.5} concentrations have been between 9.6 and 18.0 ug/m³. The highest hourly concentrations are occurring on Saturday morning, with a peak hourly concentration of 65 ug/m³. Peak air quality index values, calculated with the NOWCAST method, were in the **Unhealthy for Sensitive Groups** category.

Note that in the afternoon hours on Friday, the AQI due to ozone concentrations, which is not related to the fire, reached the **Moderate** category in the Coachella Valley.
