South Coast AQMD Continues Smoke Advisory Due to Ranch2 Fire North of Azusa and Duarte

Valid: Sunday, August 16, through Monday, August 17, 2020

This advisory is in effect through Monday afternoon. South Coast AQMD will issue an update if additional information becomes available.

A wildfire named the Ranch2 Fire is burning north of Azusa and Duarte in Los Angeles County, within the Angeles National Forest. As of 10:00 a.m. on Sunday, the burn area was 2,256 acres with 7% containment. Current information on the Ranch2 Fire can be found on the Incident Information System (InciWeb) at <https://inciweb.nwcg.gov/incident/6961/>.

Past and Current Smoke Impacts

The Ranch2 Fire is producing smoke this afternoon based on satellite imagery, webcam imagery and social media posts. Fire activity is currently generating smoke plumes which are moving to the north into the Angeles National Forest on Sunday afternoon. PM2.5 concentrations at the South Coast AQMD's monitors in Glendora, Azusa, Upland, and Crestline have been within the Good to Unhealthy for Sensitive Groups Air Quality Index (AQI) levels since Saturday evening. PM2.5 concentrations at low-cost sensors in Duarte, Azusa, Altadena, Pasadena, Arcadia, and Upland have also been within the **Good to Moderate** Air Quality Index (AQI) levels since Saturday evening. Visit <https://www.aqmd.gov/aqdata> to view current air quality conditions.

Forecasted Smoke Impacts

- On Sunday afternoon, winds near the Ranch2 Fire are predicted to be from the south and southwest and will push smoke to the north and northeast into the Angeles National Forest and western parts of the San Bernardino National Forest. There may be smoke impacts near the fire such as in Duarte, Azusa, and Glendora.

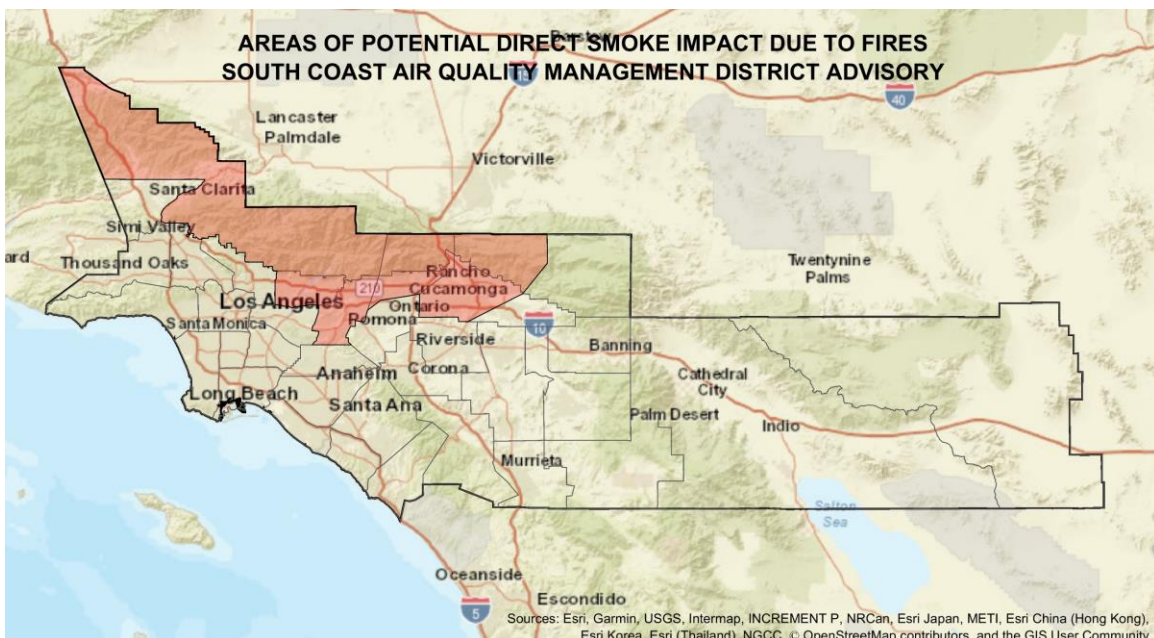

- On Sunday evening through Monday morning, winds will shift to come from the west and northwest and push smoke into the Angeles National Forest, the San Bernardino National Forest, Glendora, and Upland. During this time, it is possible that some smoke may be transported down from the higher elevations to areas south of the fire such as Duarte, Azusa, and Glendora. Elevated ground level concentrations of PM2.5 are expected overnight as the smoke is likely to remain closer to the ground.
- On Monday afternoon, winds near the fire will shift to come from the west and southwest and push any smoke to the east and northeast into the Angeles National Forest and the San Bernardino National Forest.

Overall, meteorological conditions may bring smoke and ash into portions of Los Angeles and San Bernardino counties. **Unhealthy for Sensitive Groups** or higher AQI levels due to PM2.5 concentrations are possible in areas of direct smoke impacts. Ozone levels not associated with the fire are expected to reach **Unhealthy to Very Unhealthy** AQI levels on Monday.

In any area impacted by smoke: If you smell smoke or see ash due to a wildfire, limit your exposure by remaining indoors with windows and doors closed or seeking alternate shelter, and avoiding vigorous physical activity. For more tips on protecting yourself during a wildfire, see South Coast AQMD's Wildfire Smoke & Ash Health & Safety Tips page: <http://www.aqmd.gov/wildfire-health-info-smoke-tips>.

Areas of direct impacts and poor air quality may include portions of:

- **Los Angeles County:** East San Gabriel Valley (Area 9), Pomona-Walnut Valley (Area 10), San Gabriel Mountains (Area 15)
- **San Bernardino County:** Northwest San Bernardino Valley (Area 32), Central San Bernardino Valley (Area 34), West San Bernardino Mountains (Area 36), Central San Bernardino Mountains (Area 37)
