**Subject:** Opposition to Refinery Proposals on September 6 Agenda

I am strongly opposed to this proposal to avert the process for the full board evaluation of Rule 1410 or MOU on phaseout.

Offering “voluntary” appeasement excluding public and community concerns is NOT protecting our Air Quality and that is your duty as elected members of this Air Quality Management District.

This is a highly toxic substance at a time when terrorism could easily target these refineries. We are within 2 miles of the Torrance Refinery and are extremely concerned.
