Subject: [EXTERNAL] OC Resident in Support of Clean Air For All (Rule 1146.2, 2306, and 317.1)

Dear Chair Delgado and Members of the Governing Board,

Thank you for your leadership and ongoing work on rules to ensure clean air for all. Orange County (OC) residents have experienced pollution in many forms for far too long, especially via air pollution in disadvantaged neighborhoods.

It is crucial that the board passes rule 1146.2 and continues this work on NOx emissions via the upcoming suite of NOx rules so that one day we will no longer have EJ communities suffering from NOx pollution. This is especially impactful in OC where more than 14% of all children have asthma, and NOx has been shown to cause and worsen asthma in children. Rule 1146.2 is a major step in addressing this environmental injustice in OC and the South Coast Air Basin.

Additionally, it is important to acknowledge that air, and thus air pollution does not stay in one place. This is why rules 2306 and 317.1 must also be passed, and rule 2306 must be strengthened because pollution impacts everyone in the region.

Thank you again for your leadership and dedication to ensuring the health and safety of all residents in the South Coast region.
